# 1. Turbo Token (TURBO)

An ambitious cryptocurrency experiment, Turbo Token (TURBO) was the first memecoin developed by AI. Motivated by AI, the founder issued a challenge to GPT-4 to design a revolutionary meme coin.

The TURBO price reached \$0.003912, a 35% increase, in the last day. Buyers of the AI meme coin, which is built on Ethereum, caused this surge. The price increase of TURBO is in line with the general increase in the value of Ethereum tokens with the adoption of the spot Ethereum ETF, which might cause a \$10,000 gain by June.

At the moment, Turbo has a market worth of \$244 million and is ranked 277th on CoinMarketCap. The top meme coin investment right now is CORGIAI, whose price has increased by 37% in the last week and 560% in the last 30 days.

## 2. CorgiAI (CORGIAI)

Now valued at more than \$700 million, CorgiAI (CORGIAI) is one of the most prominent artificial intelligence (AI) projects. It ranks 2723 on CoinMarketCap. The groundbreaking Corgi Cre8r tool, which highlights the project's commitment to cutting-edge technology by letting users build text-to-image NFTs, further solidifies its prominence.

The goal of CorgiAI, a meme coin that is community-driven and runs on the Cronos network, is to use artificial intelligence to create innovative products. The Corgi Cre8r is an AI-powered NFT text-to-image generator that exemplifies this principle. The mint function of CorgiAI's smart contract allows for the generation of additional tokens, which may cause the coin's value to surge by a factor of 1000, according to GoPlusLabs.

The 794 percent increase in CorgiAI's price over the last 12 months is indicative of a robust upward trend. Compared to one day ago, the price of CorgiAI has climbed 30% to its current level of \$0.002328. A price increase of 101% in the last seven days is indicative of robust bullish momentum. Thanks to its meteoric rise, CorgiAI is now a meme coin market investment worth considering.

becoming a popular joke coin. Because of this partnership, it is now widely known as a prominent meme cryptocurrency with an AI theme.

In Europe, Elon Musk's xAI has debuted their Grok AI chatbot. The goal is to answer difficult inquiries and give people up-to-the-minute information. Grok, a personal search assistant, has the ability to increase its value by a factor of a thousand by providing users with relevant, up-to-the-minute information and insights.

Grok has gained 7% in the past day, and its current price is \$0.01436. With a market cap of \$90 million, it is the 505th most valuable Ethereum-based meme coin according to CoinMarketCap.
