What is a Cat Meme Coin?

The cryptocurrency known as “cat meme coins” features a feline motif. Few have practical applications. The value of cat meme coins is completely dependent on speculation.

However, this specialised industry has the potential to become massive if it can repeat the success of dog meme coins. The impending cryptocurrency season is adding fuel to the fire.

5 Best Cat-Themed Meme Coins to Buy in 2024

Now let's take a closer look at the top cat-themed cryptocurrency coins. This will support decision-making by meme coin investors.

1. Cat in a Dogs World (MEW) -The Crypto with the Biggest Market Capitalisation and a Cat Theme

When it comes to cat-themed coins, MEW (Cat in a Dogs World) has the highest market capitalisation. There is a current valuation of about \$412 million for this project. Cat in a Dog World didn't even debut until March of 2024. Given this, it is one of the most recent cat coins available for purchase. Because of its continued popularity among meme coin speculators, the Solana network was chosen by the project.

The original price of "cat in a dogs world" was \$0.001628, as reported by CoinMarketCap. The price is now \$0.004638, which is 147% higher. However, compared to previous all-time highs, new investors will be able to gain a 54% discount. A total of 88,888,888,888 tokens are in circulation with MEW. Full amount has been distributed, with 90% already locked in the liquidity pool.

The Solana colony was airdropped with the 10% balance. With more than 61,000 X followers, cat in a dogs world is a social media powerhouse. Nearly nine thousand people have joined its Telegram group. Even though it's still in its infancy, cat in a dogs world is now trading on some of the biggest exchanges. Among these, you will find HTX, Gate.io, KuCoin, and MEXC.

2. Mochi (MOCHI) - The Best Cat Meme Coin Available Right Now

When it comes to the finest cat crypto coins, Mochi (MOCHI) is at the top of our list. A popular layer 2 alternative to Ethereum, this meme coin runs on the Base network. The logo is inspired by the cat of Coinbase CEO Brian Armstrong. One of the first Base meme currencies, Mochi debuted in the middle of 2023. The company's market valuation is a mere \$46 million.

Accordingly, Mochi is among the top low-cap coins available for purchase. Furthermore, all MOCHI tokens have been distributed. In contrast to competing cat meme coins, this will prevent any further tokens from ever entering circulation. One essential ingredient for virality is an engaged community, and we discovered that Mochi has one.

Take its approximately 7,000 Telegram members and 18,000 X followers as an example. Additionally, Mochi has around 20,000 distinct token holders. Since its launch, Mochi has had a consistent increasing trend in price performance. In the time since launch, the token price has

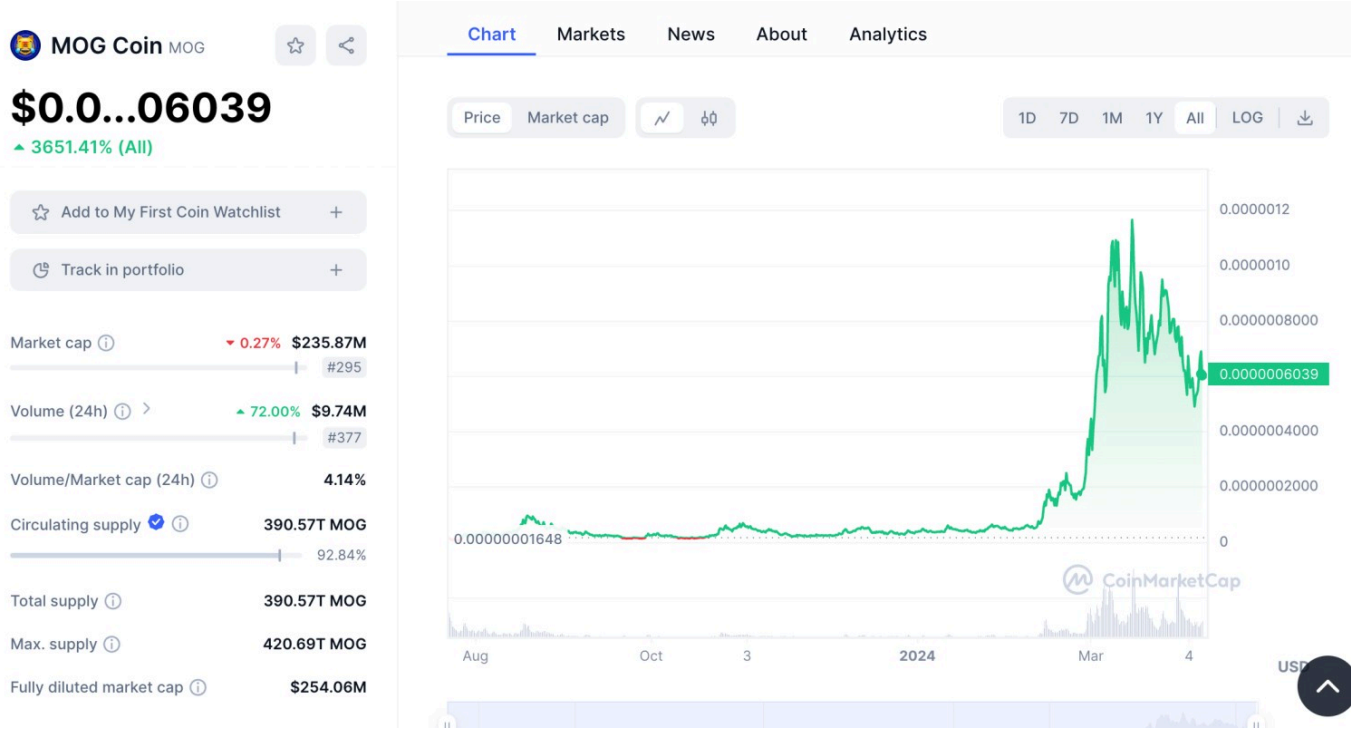

increased by more than 2,800%. However, at the moment, Mochi is trading 48% lower than its all-time highs. Because of this, new investors can purchase Mochi at a reasonable price.

3. Mog Coin (MOG) - Top Cat Cryptocurrency on the Ethereum Network, 53% Off ATHs

On the Ethereum network, Mog Coin (MOG) stands out among the greatest cat meme coins. With a gain of more than 3,600% since its introduction in mid-2023, MOG is also among the top performers. But the market for Mog Coin has taken a nosedive in the past several weeks. There is a 53% discount off the all-time high for MOG tokens if purchased today.

With a current market valuation of \$235 million, Mog Coin has a lot of potential for further growth. Plus, in the last day, MOG has changed hands for roughly \$10 million. Interest in MOG is growing as a result of this, as it is up 71% from the previous trading session.

You can also buy and sell Mog Coin on many popular exchanges, including Gate.io, MEXC, HTX, and Crypto.com. More than 131,000 people follow Mog Coin on X, which is great. Keep in mind, though, that Mog Coin is useless to investors. Token holders won't see any increase in value over time, unlike other meme coins.

4. Wen (WEN) - Cat Coin Based in Solana Has Gained 500% Since January 2024

Continuing our rundown of cat meme coins, we have Wen (WEN), another token that functions on the Solana network. The poem "A Love Letter to Wen Bros." serves as the inspiration for this undertaking. It partitioned the poem into a trillion pieces, with a fractional token supporting each one. What this means is that the poetry is owned proportionally by WEN holders.

However, as a meme coin, Wen is most famous for its speculation value. It debuted in the tail end of January 2024 and has been doing well ever since. The price of a single WEN token was a mere \$0.00005976 in those days. The price of WEN has increased by more than 500% today, trading at \$0.0003394. The market valuation of Wen is more than \$245 million at the present time.

This is a great opportunity to get in on the cat meme coin trend before it gets too popular. Furthermore, Wen is trading at a discount of nearly 35% to its all-time highs right now. Wen also happens to have one of the biggest followings on social media. On X, the initiative has over 147,000 followers. Among the many platforms where Wen is a trader are MEXC, Gate.io, and KuCoin.

5. Toshi (TOSHI) - Building Use Cases for Token Holders in the Trending Base Meme Coin Project

Toshi is a top-tier meme coin on the Base chain. Brian Armstrong’s pet cat served as inspiration for both Mochi and this endeavour. Toshi has a far higher market cap than Mochi, despite being Mochi’s younger sibling. Toshi is worth more over \$265 million at the current market value. With more than 50,000 token holders, Toshi clearly has a dedicated following.

Not to mention, X already has over 32,000 followers. The fact that Toshi is creating practicality is a major selling element. Among these features is a “Multi-Sender” tool and a platform for the introduction of new Base tokens. Because of this, projects can airdrop a lot of tokens at once.

New Base projects can also use Toshi to lock their liquidity pool transparently. There has been a performance gain of more than 1,700% for Toshi since its inception in August 2023. More than 150% growth was observed in the previous month. However, decentralised exchanges are the only places you may trade Toshi. On Uniswap, the trade volume is the most prevalent.

Is Cat Meme Coin a Good Investment?

The majority of cat meme coins are useless, as we have shown. So, the only reason people acquire cat coins is to profit from them. Fear of missing out and market speculation are the main factors that drive their worth. Still, more and more cryptocurrency investors are putting their money into this specialised sector.

A lot of credit for this goes to the popularity of dog-themed coins. Floki, Dogecoin, Bonk, Shiba Inu, and dogwifhat are among the top dog meme currencies. The market capitalisation of each of these projects is more than one billion dollars.

Cat meme coins have recently attracted the attention of speculative speculators. The market is in its early stages, therefore there is a lot of room for growth. As an example, according to CoinGecko's data, the sum of all tokens with a feline theme is only \$1.8 billion. The value of dog-themed coins, on the other hand, is about \$55 billion.

Conclusion

Among meme coins, cat-themed tokens are all the rage right now. Investors have time to get in before the market goes boom because its total value is less than \$2 billion.

Mochi, Wen, Mog Coin, and Cat in a Dog World are a few of the top cat currencies to think about. Make sure your portfolio is diverse and that you conduct your own research before investing.
