What is Augur (REP)?

The Augur platform's native [cryptocurrency](#), REP, is built on the Ethereum Blockchain. REP Token is a promising startup due to its original roadmap and strong community backing. The fact that Augur Coin can now be traded on Kraken and OKX, two major [cryptocurrency](#) exchanges, has increased its popularity among investors. Augur Coin's price could explode in the next months thanks to increasing investor interest and new listings on other major exchanges.

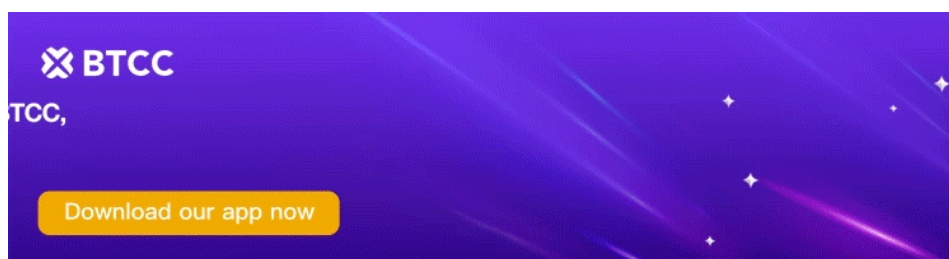

Augur is a peer-to-peer protocol for prediction markets and a distributed oracle. Augur is an open-source, public project that works with blockchains that are compatible with Ethereum and the EVM.

Individuals can engage in futures trading on the Augur prediction market. Users who make accurate predictions receive a financial reward, while those who do not lose their stake. The Augur platform facilitates prediction market trading, allowing users to place wagers on their preferred sporting, economic, and global events.

Users of the Augur project's blockchain-based bidding mechanism can place wagers on virtually anything.

Is Augur (REP) a Good Investment?

The popularity of the Augur project has skyrocketed in a short period of time, yet the project's future remains uncertain. In addition to a prediction platform and a DAO, the Augur project has released a slew of other efforts. The Augur Coin is quickly becoming one of the most popular prediction market ventures. We found that investing in REP Coin for the long run is a viable decision, based on the data we have gathered.

Long-term charts for Augur Token reveal promising gains. We warn our readers that the price of cryptocurrencies, especially when it appears to be rising, is highly unpredictable. If you're a savvy investor who likes to think long-term, Augur Coin may be a good option for you. Today, cryptocurrencies are the most lucrative investments, but also the riskiest. Do your risk management homework before making any financial commitments.

Will Augur (REP) Hit \$100?

Already in 2018, Augur token has surpassed the \$100 goal despite losing 90% of its value. The last five years of Augur data don't seem good. Many cryptocurrency investors, however, may be wondering if the REP Coin can once again reach its goal price of \$100 given that the Augur project is expanding. Based on historical performance, it is unlikely that the Augur Token will reach its goal of \$100 before the end of this decade. If Augur Token keeps growing at its current rate, our long-term forecast of \$100 may be reached within the next decade.

The Augur project, with its new initiatives, has the potential to become well-known in the blockchain community in the coming months. Anything is conceivable in the crypto market. A strong bull run or bear rally can obliterate all the price projections in seconds, as we have seen with other coins in the past, therefore it is not easy to say that such forecasts can be correct. The Augur Token's price has the potential to rise, and it may reach its \$100 target before we predict it if more investors are drawn to the initiative.
