What Exactly is Core DAO?

Core DAO is a decentralized blockchain platform that operates at the core of [Web3](#) technology. It uses a completely new consensus mechanism called “Satoshi Plus” which leverages EVM and Bitcoin mining hash rate i.e., it combines proof-of-work ([PoW](#)) and Delegated [proof-of-stake](#) (DPoS) and leverages the strengths of both.

It is worth noting that Core DAO is the first one to implement this new consensus algorithm.

Core DAO launched its mainnet on January 14. EVM-compatible blockchain Core DAO is now live. As per Core DAO’s official announcement, the launch of its mainnet would enable Bitcoin’s soundness,

security and decentralization to meet the interoperability, composability, and scalability of [Ethereum](#) blockchain.

The Satoshi Plus consensus is built to solve the shortcomings of Bitcoin and Ethereum Blockchain by combining the PoW of Bitcoin and DPoS of Ethereum to improve scalability, security, efficiency, and decentralization alongside EVM compatibility unlock the power of decentralized applications for everyone- developers, users. Its aim is to merge the fundamental elements of the blockchain world to its optimal potential.

As is well known, the blockchain sector has advanced swiftly over the past decade and introduced several innovations, developments, and insights. Imagining what the blockchain would look like in 2023, when Satoshi originally planned to release [Bitcoin](#), provided the idea for the Core's design. Thanks to Bitcoin's mining hash power, a blockchain that is Turing-complete and EVM-compatible is now ready to serve as the backbone of Web3.

After the integration, Core DAO would work on cementing the Core network with the help of Bitcoin's mining community, and it would also decentralize and safeguard its network through staking. Core has accepted Bitcoin miners as Satoshi Plus's "proof of operation" feature and has already been working smoothly since the beginning. Assigning hash power to the Core system is an extremely easy procedure, and new miners would get bonus prizes.

The goal of Core is to support the Bitcoin network by giving Bitcoin miners rewards, which will serve

as a second [BTC](#) block reward when the Bitcoin supply runs out in the near future. Core has advanced thanks to its guiding concept, which forbids any kind of compromise on scalability, security, and decentralization.

Core DAO is getting much support from all over the world, as at the time of writing this line, the total number of Satoshi BTCs miners exceeds 10 million with over 47 million apps downloaded. And several cryptocurrency projects are already eyeing to build on the Satoshi Plus consensus. However, it takes a lot of conviction and patience to concentrate on the core blockchain components. Due to the lengthy process involved, the Core's adventure is just beginning with this launch.

As we mentioned in our opening, Core DAO has launched the airdrop for its CORE token on February 8. The Satoshi Plus consensus protocol warned users to note illicit \$CORE tokens launched on several platforms. While the airdrop will create liquidity for \$CORE, market volatility is inevitable. To regulate the difficulties in the market, top-tier market makers and exchanges support legitimate early market \$CORE formation.

"The liquid \$CORE markets will open around the same time as the Feb 8th airdrop. In the coming days, \$CORE transactions from Core DAO's public reserve multi-sig will be executed to get CORE tokens to partner market makers so that liquid markets exist when the airdrop occurs," Core wrote. "Having legitimate \$CORE token markets available when the airdrop occurs will allow for safer, faster, and more accessible trading for Core users."

Once the airdrop is complete, users can participate in the network's development by staking.

With the number of exchanges supporting \$CORE's listing, users can expect a significant asset value. The countdown is already on.

One popular and reliable exchange for you to buy CORE is [BTCC](#), you can check the links below to [create an account](#) on BTCC and start trading now.

Core DAO Price Prediction 2024

According to the short-term price forecast, CORE may see major price volatility in the near future. The table below provides a brief overview of the coin's performance over the next 30 days.

Date	Lowest Price	Average Price	Highest Price
April 1, 2024	\$3.76	\$3.76	\$3.77
April 5, 2024	\$3.78	\$3.78	\$3.78
April 9, 2024	\$3.79	\$3.80	\$3.81
April 16, 2024	\$3.82	\$3.83	\$3.84

Core DAO Price Prediction 2025

Core DAO looks well-positioned to reach its full potential in the coming years. If the Core DAO successfully boosts market sentiment among crypto enthusiasts, CORE crypto price could continue to rise for the next five years.

In 2025, CORE price is estimated to reach \$3.05, at minimum, and the maximum price could be \$4.22, according to our Core DAO price prediction 2025. The forecasted average price could be \$3.47.

Core DAO Price Prediction 2030

The Core DAO ecosystem is actively growing with new users and will remain viable in the long term. Our Core DAO price prediction 2030 forecasts CORE to trade between \$7.20 and \$8.15 by the end of 2030. The average price of CORE coin might go to \$7.39.

With this long-term horizon, Core DAO will have plenty of time to prove itself. The \$CORE token will unlikely be trading at high valuations based on speculation alone. If Core DAO continues to grow and be a top crypto project, this price prediction could be possible.

Here, it's worth pointing out that 2030 is still a long way away. 7 years down the line, the crypto market could be affected by a host of different events and updates, each of which is difficult to ascertain. Ergo, it's best that predictions like these are taken with a pinch of salt.

Will Core Coin Reach \$100?

Investors who are particularly bullish on CORE coin often discuss Core DAO price prediction \$100. To reach \$100, CORE will have to rise 131x, which translates to a market cap of 12.6 billion. While this is not unusual in the crypto industry and many tokens have achieved this target, there are practical challenges and there has to be significant progress in CORE use cases to justify these levels.

Though CORE token reached its high value of \$5 in February 2023, where it grew by nearly 1.31 times in less than one month (i.e., from the lowest price of \$3.8), it is not showing a great improvement since then and trading below the \$1 mark at press time.

Hence, base on current trend and our analysis, we believe that \$100 is a theoretical possibility for Core DAO but the odds of it becoming real are extremely low if not impossible.

Where Can I Buy CORE?

Notable options for purchasing CORE coin include OKX, BTCC and Huobi. Among these, [BTCC](#) is one of the best exchanges as it witnesses a large trading volume of CORE.
