What is eCash (XEC)?

Wealth is reimagined on the eCash cryptocurrency platform. With eCash, you can make instantaneous international payments even if you don't have a bank account. The Bitcoin Cash ABC network is a group of seasoned engineers who have been working on the project since 2017.

Amaury Séchet, an early Facebook programmer and Bitcoin developer, is in charge of the eCash project. He contributed greatly to the growth of Bitcoin and launched Bitcoin Cash. In July of 2021, he launched the eCash brand. Bitcoin ABC is a software company that interacts with and supports the eCash network, whose namesake cryptocurrency is eCash XEC.

A hard fork in the Bitcoin cash blockchain led to the creation of eCash. Its ticker symbol changed from BCHA (for “Bitcoin Cash ABC”) to XEC (for “eCash”) when its name changed.

eCash’s product team is led by Amaury Séchet. According to him, eCash XEC is preferable to fiat currency since it serves as a better means of exchange and a more reliable store of value. All profits from the eCash protocol are re-invested in the project. At a discount, customers can make custom Etoken bearing their name, decimal places, supply, and icon.

The ultimate goal of eCash XEC is to produce universally usable currency. The ‘Avalanche’ proof of stake consensus mechanism is included into the eCash network and allows for fast payments.

Improved safety and the absence of forks necessitate a transaction confirmation time of less than one second. Due in large part to Avalanche, eCash is now a democratically decentralized, technically robust system. The eCash network enhances Ethereum DeFi and is compatible with the Ethereum Virtual Machine (EVM). Creating new monetary-related software and services is a breeze with EVM. It also eliminates the need for miners thanks to its POS consensus.
