What is the Gods Unchained (GODS)?

Play-to-earn metaverse games and non-fungible tokens (NFTs) may be the most important developments in the cryptocurrency market over the past two years. In case you didn't know, NFTs

are essentially collectible, one-of-a-kind pieces of digital art. When you buy a non-fungible token, you're essentially buying the right to access the artwork, which you can keep, sell, or trade.

One way to think about the metaverse is as a virtual place where people can meet new people and share their stories. There are now many blockchain-based metaverses, each with its own cryptocurrency.

Gods Unchained is the name of a similar game. In essence, it's a blockchain-based online trading card game that's free to play. Users can compete in duels for rewards and purchase, sell, and exchange fantasy cards with one another.

Smart contracts, self-executing computer programs, verify the ownership of cards, which are NFTs, when predetermined conditions are met. The game comes complete with several different pre-made decks. You can purchase different skins and weapons within Gods Unchained. Since all betting is done off-chain, there are no transaction costs.

You can buy and sell fantasy cards on the TokenTrove market or through the game's developer, Immutable X, who created Gods Unchained. The network's whitepaper claims that its tokens adhere to the ERC-721 standard, making them usable in any game built on the platform. This marketplace is accessible online.
