How to Buy Base Dawgz (DAWGZ) - Everything You Need to Know

Original:

<https://www.btcc.com/en-US/academy/research-analysis/how-to-buy-base-dawgz-dawgz-everything-you-need-to-know>

A brand-new meme coin project called [Base Dawgz \(\\$DAWGZ\)](#) is presently soliciting presale money. It functions mostly on the Base network, one of the ecosystems with the quickest pace of growth in 2024. Additionally, \$DAWGZ will go live on other well-known networks, guaranteeing cross-chain compatibility for token owners.

How to purchase Base Dawgz during the presale is covered in this guide. We also look at the possible benefits of Base Dawgz, how it operates, and the risks you should weigh before moving forward.

What you should know about Base Dawgz is as follows:

Presale Project: The eagerly awaited presale campaign for Base Dawgz has officially begun. The amount raised in the first 24 hours is close to \$215,000. Since the presale is still in its first stage, investors who act now will receive the best deal. Tokens for \$DAWGZ are being sold for \$0.00479.

Dog-Themed Meme currency: Base Dawgz is essentially a meme currency that draws inspiration from the Shiba Inu breed of dogs. These days, meme coins—especially those on the Base network—are very popular. Staking pools, or passive incentives for holders, are another feature provided by Base Dawgz. Additionally, a refer-to-earn concept has been established. Ten percent of the investment amount, payable in USDT, is awarded to those who recommend investors to the presale.

Interpretability Across Chains: Base Dawgz functions within the ever expanding Base network. However, because \$DAWGZ will work in other ecosystems as well, it also provides cross-chain interpretability. This covers Avalanche, Polygon, BNB, Ethereum, and Solana. Base Dawgz will thus be exposed to the world's busiest blockchain networks.

Post-Presale Listings: Base Dawgz is a pre-listing project at the moment, meaning that investors will purchase \$DAWGZ tokens prior to their public sale. Base Dawgz will become live on decentralised exchanges following the presale. In order to gain more visibility, it will also collaborate with centralised platforms.

What is Base Dawgz (DAWGZ)?

To sum up, Base Dawgz is an emerging meme coin initiative. It's based on Coinbase's rapidly expanding network, Base. Due of Base's ultra-low costs and instantaneous transactions, this network is perfect for exchanging meme coins. Still, Base Dawgz is a meme currency that works with other chains. It may so function on various networks.

All of the following are part of it: Solana, Ethereum, Avalanche, Polygon, and BNB. Because of this, Base Dawgz will be able to connect to the most dynamic blockchain networks. Base Dawgz also allows token holders to switch chains whenever they choose, which means it supports interpretability.

Base Dawgz has chosen the Shiba Inu dog breed as their emblem, similar to numerous meme currencies. Although this isn't entirely original, the most successful meme coin projects—like FLOKI, Dogecoin, and Shiba Inu—use a similar idea. Presale participants expect huge returns despite Base Dawgz's lack of intrinsic value.

Since the success or failure of presale tokens is completely unpredictable, these possible gains are already factored into the risk spectrum. As an example, \$8 million is the bare minimum for a presale. There will be a presale where 20% of the token supply is sold. Therefore, following the presale, the market capitalization must be at least \$40 million. A lot of meme coins are valued more than a billion dollars, therefore the potential gain might be substantial.

Plus, once the presale is over, investors can stake their \$DAWGZ tokens. Despite the lack of stated APYs, early staking of new cryptocurrencies sometimes yields substantial interest yields. Additionally, Base Dawgz has a refer-to-earn programme going. All you have to do is share your special referral link with your loved ones.

And when they put money into the presale, you'll get 10% of the retail price. The currency used to pay referral commissions is USDT. Do not put more money into Base Dawgz than you can afford to lose, even though it has all the makings of the next big cryptocurrency. Remember that presales, particularly for new meme currencies, are extremely risky. You run the risk of losing money as much as you stand to gain it.

How to Buy Base Dawgz (DAWGZ)?

Skilled cryptocurrency traders can invest in presales in a matter of minutes. A [cryptocurrency](#) wallet that you can keep your coins in on your own is all that's required. But you might require some assistance if this is your initial purchase of presale tokens.

Keep reading, and we'll show you the quickest way to purchase Base Dawgz tokens.

Step 1: Create a Wallet That Is Compatible with Base Chain

Establishing a wallet is, thus, the initial stage. In order to participate in the Base Dawgz presale, you will need this. Things become more complicated from here on out.

Popular cryptocurrencies such as ETH, BNB, and SOL are all welcome in the Base Dawgz presale. It follows that you can use any wallet that works with these systems. But Base Dawgz is a token for the Base network. What this means is that you need to select a wallet that can communicate with the Base network.

Choose Trust Wallet instead. It works with Base and any other network that Base Dawgz supports. Over a hundred million traders have downloaded the Trust Wallet app, which is available for both Android and iOS.

Get the Trust Wallet app, install it, and launch it. Set up a new wallet and a PIN at the same time. Your backup passphrase will appear as a string of twelve random words on the screen. Make sure you record it in the right sequence and store it securely.

It's time to purchase some coins and add them to your Trust Wallet. The Base Dawgz presale may only accept this coin.

Step 2: Deposit Coins to the Trust Wallet

Take a look at these choices:

- **ETH/USDT** (Base)
- **ETH/USDT** (Ethereum)
- **BNB** (BNB Chain)
- **AVAX** (Avalanche)
- **SOL** (Solana)

You can invest using one of the aforementioned coins if you already possess one. The Trust Wallet app allows you to buy some if you don't have any.

To purchase a coin, just click the "Buy" button. On the Ethereum network, USDT is our recommendation. Its value is directly proportional to the US dollar, making it easy to gauge your investment.

Based on the currency and payment method you want, Trust Wallet will suggest the optimal fiat gateway. Many online payment processors accept major credit cards and certain electronic wallets.

A government-issued photo ID and your personal details will need to be entered. Please note that this needs to be done just once. Instant coin purchases will be available thereafter.

You will see the coins in your Trust Wallet balance once everything is confirmed.

Step 3: Link Wallet to the Website for Pre-Sale

The prerequisites for participating in the Base Dawgz presale have been fulfilled.

The presale dashboard can be accessed by visiting the Base Dawgz website and then clicking on the selected network. Each of the five logos stands for one of the supported networks.

Click the Ethereum logo if you're investing USDT on the Ethereum network, as indicated. Select "Connect Wallet" from the menu that appears. The next step in investing is to select your wallet. If you listened to our advice, that's Trust Wallet.

Step 4: Finish the Base Dawgz Pre-Sale Purchase

A connection between your wallet and the presale page should now be visible. The next step in exchanging coins for \$DAWGZ is to input the desired amount of coins.

As an illustration, we have entered 750 USDT. According to the presale dashboard, 156,576

\$DAWGZ tokens will be distributed. Since the presale price is now \$0.00479.

The last thing to do is to verify the investment using your linked wallet. Therefore, launch Trust Wallet and give your approval for the deal. After that, the presale wallet belonging to Base Dawgz will get the coins.

Step 5: Get Tokens for \$DAWGZ

Investors will receive \$DAWGZ tokens from Base Dawgz once the presale concludes. Go back to Base Dawgz's website to get your tokens when that happens.

You must link the identical wallet that was utilised for investment. This will make sure that no one else can file a claim. After that, the funds will be moved to your Trust Wallet. They will stay until you make the decision to sell.

Why Buy Base Dawgz?

The fundamentals of Base Dawgz's operation have been covered. Let's investigate the investment theory now.

Here's why 2024's Base Dawgz cryptocurrency presale might be among the greatest.

Base Meme Coins Have a Catchy Story: One of the most reliable exchanges in the world, Coinbase, supports Base, a layer 2 network. With more than 100 million users, Coinbase just introduced its "Smart Wallet." Retail customers will find it easier to invest in Base meme currencies from their Coinbase account as a result. In light of this, Base is one of the networks that is

expanding the fastest, with members such as Mochi, Toshi, and Brett making substantial profits. Since \$DAWGZ's primary home is the Base network, it is profiting from these trends.

Share-to-Earn: A technique for sharing to earn has been developed by the Base Dawgz team. To put it simply, points are awarded to those who share Base Dawgz material on social media. Then, accumulated points can be exchanged for tokens worth \$DAWGZ. This is a wise decision because it will promote the project to the cryptocurrency community naturally and without the need for running funds.

Cross-Chain Access: \$DAWGZ tokens will function on other networks in addition to Base. This covers well-known ecosystems such as BNB, Solana, and Ethereum. Not to mention emerging networks such as Polygon and Avalanche. Therefore, purchasing Base Dawgz is simple for any current traders inside these ecosystems. As a result, holders of \$DAWGZ will greatly benefit from the abundance of organic liquidity in the market.

Presale Discount: As the lowest entry price before to the exchange listing, seasoned meme currency investors frequently purchase tokens during the presale campaign. It's the same with the Base Dawgz presale. Investors in stage one only pay \$0.00479 for each token. Each five days, the presale price rises by 5%. This implies a 5% gain on each implementation of the price hike.

Staking Benefits: The ability to stake \$DAWGZ tokens is an additional incentive to purchase Base Dawgz. Passive rewards will result from this. You only need to unstake your stakes when you're prepared to cash out your position. You can increase your \$DAWGZ earning potential by doing this.

Conclusion

Invest in a genuine Base meme coin during the Base Dawgz presale. It's a once in a lifetime chance. The presale price goes raised by 5% every five days, giving investors a quick return on their investment.

In addition to supporting Ethereum, Polygon, Avalanche, and Solana, Base Dawgz is a meme coin that works on several chains. Because Base Dawgz's success is by no means guaranteed, presale participants should exercise caution and do their homework before investing.
