What is JasmyCoin?

Launched in October 2021, JasmyCoin is a new blockchain project from Japan. The Jasmy platform has its native token called JASMY. It is an Ethereum-based token and the first cryptocurrency to be made legally compliant in Japan. This is crucial since Japan is a country where cryptocurrencies are extensively regulated and subject to strict rules.

Jasmy's decentralized blockchain is built to restore and safeguard personal data control. It combines traditional Internet of Things (IoT) with blockchain technology, giving users total control over how and when their data is utilized.

The project also offers its users a "personal data locker" where they can safely keep their information. The goal is to establish a setting where users would JASMYly control their data and decide how to use it. IoT devices will be a source of new data that builds up in the data locker.

Its coin JASMY is designed to be a payment cryptocurrency: companies who want to get access to user data can do so by buying it and paying in JASMY. This boosts the chances for data-dependent organizations to collect data, which is typically difficult to come by. It is anticipated that the value of the data will rise as the market grows.

As a blockchain, Jasmy is concerned with metaverse data security and exchange. With the world of metaverse expanding, one significant problem within the metaverse and blockchain worlds is the lack of an effective, decentralized data storage system.

Jasmy comes into play in this field and thereby differentiated itself from the rest of the blockchains. With metaverse applications built on the network can establish direct bridges for data exchange between themselves. Jasmy offers a safe, user-oriented environment in which data can be stored, saved, or exchanged.

JasmyCoin Price Prediction 2030

Certain that the long-term price prediction for JasmyCoin's price will soar since there is still optimism that the crypto will attract much more attention. In 2030, the JasmyCoin price is estimated to reach \$0.024291, at minimum, and the maximum price could be \$0.026641, according to our JASMY price prediction 2030. The average price of JASMY might go to \$0.025466 by the end of 2030.

Changelly's Jasmy Coin price prediction for 2030 is more bullish, which forecasts JASMY to trade between \$0.075 and \$0.092 by the end of 2030, averaging out at \$0.078.

Here, it's worth pointing out that 2030 is still a long way away. 7 years down the line, the crypto market could be affected by a host of different events and updates, each of which is difficult to ascertain. Ergo, it's best that predictions like these are taken with a pinch of salt.

Will Jasmy Coin Reach \$1?

No one knows the future but tons of people are talking about Jasmy Coin. To reach \$1, Jasmy will have to rise 256x. That translates to a market cap of \$49 billion.

Mathematically and in theory this is feasible. Many tokens have managed to achieve this target. But in reality, it seems quite impractical and far-fetched. There has to be serious progress in Jasmy Coin use cases to justify these levels.

Based on current trends, we would say that it would be difficult for Jasmy coin to hit \$1 in the near future. But we do believe that JASMY can reach \$0.1. Of course, anything can happen in the crypto market, so this is by no means a guarantee.

Can Jasmy Coin Reach \$10?

Jasmy coin's current market price is \$0.0039 and hence, it requires to grow by 2,564 times to reach a price level of \$10.

JASMY reached its all-time high value of \$4.99 in February 2021 where it grew by around 3.8 times in less than one month (i.e., from the lowest value of \$1.3).

Therefore, considering its 3.8 times growth in one month, we can say that the Jasmy coin can take around 56 years to reach \$10. But that's just a theoretical projection.

First of all, it is not even practical to wait for 56 years for Jasmy coin to reach that value. Secondly, it might take even more time to reach that value because the market conditions (of liquidity and inflation) now are entirely different from that in 2021.

Therefore, as we analyzed above, it would be unlikely for Jasmy coin to reach \$10 based on the available data and current conditions.
