Meme AI Coin Price History

Though it didn't appear on CoinMarketCap until January 12th, 2024, Meme AI went live on January 7th, 2024. During its initial trading days, Meme AI fluctuated between \$0.0018 and \$0.0024, reaching a low of \$0.001799 on January 14th. Its price history began at \$0.002094 and continued sideways.

The Meme AI token experienced its initial surge on January 17th, rising 267% in just fifteen minutes from \$0.003748 to its present all-time high of \$0.013777.

The \$MEMEAI token lost 81% of its value in just three hours and dropped below the \$0.0025 threshold in less than twelve hours after retracing these gains. After bouncing off this level, \$0.0025 became a temporary support for Meme AI; whether or not this support lasts in the long run is anyone's guess.

Meme AI rebounded off this new support, surged to about \$0.0055, and then retreated to its previous level. After a brief slide to support at \$0.0025, it recovered and re-entered the market at \$0.0040.

Meme Ai Price Prediction March 2024

Meme Ai's (MEMEAI) trading chart shows a steep and quick increase in value, a pattern commonly seen in parabolic surges. After this sharp rise, the price has pulled back to a significant pivot point, which is now about \$0.025833.

After the recent volatility, the price may find stability near this level, which could act as support. Additional levels, S1 at \$0.013016 and S2 deep in negative territory, could provide future resting areas for the asset's valuation if this pivot fails to supply the necessary support.

In contrast, the chart shows that the upward trend of MEMEAI may face selling pressure that could limit future gains at R1, which is located at \$0.045046, and R2, which is at \$0.057883.

In addition, the fact that a surge in trading volume coincided with the price increase shows that traders were actively involved during that time, which confirms the momentum that drove MEMEAI's first climb.

But, the most recent session has shown a different picture—a red candle that represents a

substantial intraday decrease of 17.41%, with the price currently lying at \$0.026600. As those who were early to the rise cash in on their gains, this decline heralds a time of profit-taking.

The market's perception of the recent top as a durable valuation milestone or a transient spike generated by a short-term frenzy may be heavily influenced by the extent and type of this drop.

Meme Ai Price Prediction 2024

Price Prediction	Potential Low (\$)	Average Price (\$)	Potential High (\$)
2024	\$0.013016	\$0.0564	\$0.20

The fascinating and unpredictable journey of the cryptocurrency market is depicted in the chart with Meme Ai. A typical pattern, with interest spikes causing fast price surges, MEMEAI had a huge parabolic increase in 2024.

The Meme Ai's potential for growth is high if the cryptocurrency market maintains its upward trajectory in 2024, driven by the anticipated bull run. The value of Meme Ai might rise to \$0.20 if its user base continues to increase. The increased use and popularity of meme currencies would cause their value to skyrocket.

However, if the market experiences a decline as a result of liquidity issues or a more generalized recession, the price of Meme Ai could plummet significantly. As a support level, it can fall to \$0.013016 following a crash, according to the chart. Such investments are extremely risky and vulnerable to rapid price changes, as this situation shows.

Meme Ai Price Prediction 2025

It is possible that the value of Meme Ai might rise above \$1 due to the increasing interest in the cryptocurrency, fear of missing out (FOMO), and its increasing importance in the NFT industry. Additionally, Meme Ai is on the verge of becoming more than simply another meme coin and could achieve even greater success.

On the other hand, Meme Ai might settle at \$0.60 if it has trouble keeping its momentum. On the flip side, if Meme Ai loses its appeal, its value might fall to \$0.15.
