Notcoin Price Prediction Summary

The TONNE Network is the foundation of Notcoin, a play-to-earn token that was created on the original Telegram blockchain before it was spun off into its own project. One such Telegram applet is the Notcoin game, where players may earn tokens—which can be exchanged for the \$NOT

cryptocurrency—by tapping on virtual coins.

By the time token redemptions for \$NOT began on May 16, 2024, the Notcoin game had 35 million active participants, proving its immense popularity. The \$NOT coin went live for trade on decentralised exchanges that very day.

At its current price of \$0.0244, \$NOT has had an almost 350% explosion from its debut to the beginning of June. Investors have considered it one of the top alternative cryptocurrencies of the year thus far. With a current market worth of \$2.5 billion, the token ranks as the 47th biggest cryptocurrency.

Our current understanding of Notcoin is as follows:

- The current price of NOT/USD, according to our real-time data, is \$0.0244.
- While Binance and Coinbase have not yet added \$NOT to their platforms, the majority of big exchanges do.
- Outside of \$TONNE, \$NOT is the most valuable coin on the TONNE Network, with a market valuation of \$2.5 billion.
- \$TONNE is the seventh most traded coin by market cap with a 24-hour trading volume of \$2.2 billion.

With over 700 million users globally, Telegram is the perfect platform for Notcoin’s game. Not only that, but it is a component of the TONNE Network, a new blockchain that is gaining traction quickly and has the support of Telegram.

Pavel Durov, the creator of Telegram, is supporting \$NOT, which is good news for the currency. Durov has stated his intention to keep onto the token until its value increases by a factor of 100, and he was given \$7 million worth of \$NOT by holders.

Taken together, these indicators point to a bright future for Notcoin, with price gains expected all the way into 2025. In the long run, \$NOT’s value might be maintained by further development of the Notcoin game, which could keep engagement high.

Our \$NOT pricing forecast is detailed below:

Year	Potential Low	Average Price	Potential High
2024	\$0.013	\$0.050	\$0.085

2025	\$0.025	\$0.090	\$0.150
2030	\$0.010	\$0.145	\$0.275

What is Notcoin?

One such crypto game that was established on the Telegram network is Notcoin. The game is designed such that users can earn coins by tapping a digital token. These coins can be exchanged for \$NOT tokens using the TONNE Network.

Simple actions, like following social media profiles, can earn Notcoin gamers more tokens. You can climb the game's leaderboards and earn more tokens for your performance if you earn a lot of \$NOT tokens.

Although Notcoin is not yet usable for in-game purchases or upgrades, it can be staked to gain value. You can also get a special Notcoin NFT if you have over 10 million \$NOT tokens.

The Notcoin team is working on a token swap that will make trading \$NOT easier in the future.

Developers will also soon be able to use the \$NOT token to make their own play-to-earn games on the platform.

[TRADE_PLUGIN]NOTUSDT,ETHUSDT[/TRADE_PLUGIN]

Notcoin (NOT) Overview

In the Notcoin play-to-earn game, participants can earn the \$NOT token. It's a part of the TONNE Network ecosystem and can be traded for \$TONNE or any other TONNE Network token with ease.

Presently, there are 102,719,221,714 \$NOT tokens in circulation, which is the entire supply of Notcoin. A current valuation of \$2.55 billion is assigned to the coin.

Cryptocurrency	Notcoin
Token	NOT
Price	\$0.0244
Market Cap	\$2,547,150,694
Circulating Supply	102,719,221,714
24 Hour Trading Volume	\$2,285,048,513
All-Time High	\$0.02896
All-Time Low	\$0.004605
24 High	\$0.02644
24 Low	\$0.0214

Notcoin (NOT) Price History

On May 16, 2024, Notcoin was live for trade. When that happened, early Notcoin users could trade their in-game tokens for real money on the TONNE Network.

After 10 days of trade, the coin's price dropped from \$0.010 to a low of \$0.0046. Following this, the price of Notcoin surged, reaching a new peak of \$0.02896 on June 2.

At its current price of \$0.0244, the token has a market valuation of over \$2.5 billion, an increase of approximately 350% from its initial price. At its height, \$NOT's 24-hour trading volume was over \$4.3 billion, demonstrating exceptionally strong trading activity. All cryptocurrencies except Bitcoin and Ethereum saw a decline in trading volume as \$NOT soared.

[TRADE_PLUGIN]NOTUSDT,ETHUSDT[/TRADE_PLUGIN]

Notcoin (NOT) Price Prediction 2024

Considering how optimistic the cryptocurrency market has been in 2024, the fact that Notcoin is among the most talked-about tokens says a lot. It is impossible to disregard the token's high trading volume and the fact that its popular play-to-earn game has drawn over 35 million users. The most crucial point is that these signs show that Notcoin's ascent is not going to be a passing fad.

Based on its present trajectory, we believe Notcoin can continue to rise. Despite a drop from \$4.3 billion to \$2.2 billion in trading activity, that's still a massive amount of volume and accounts for virtually all of \$NOT's market value being exchanged every day.

Also, Notcoin still has the world's two biggest exchanges, Binance and Coinbase, to list on, which will be a major catalyst. According to research, tokens usually see a 41% boost after being listed on Binance. Given the amount of attention \$NOT has already received, the gain could be considerably bigger. If \$NOT were to be listed on Coinbase, its value could skyrocket.

We also think \$NOT will go further because it has only reached a small percentage of its potential users. Notcoin has 35 million players right now, which is a massive amount, but Telegram has over 700 million users. This means that Notcoin has the ability to bring in 20 times the amount of players it has right now—all without switching platforms.

We are encouraged by all of this and think that Notcoin will continue to expand in 2024. With a potential high of \$0.085, a 3.5x gain from today's \$NOT pricing, we anticipate an average price of \$0.050, which is slightly more over double the token's current price.

Our forecast for the price of Notcoin in 2024 is detailed below for each month:

2024	Price
June	\$0.032
July	\$0.037
August	\$0.041
September	\$0.044
October	\$0.046
November	\$0.049
December	\$0.050

Notcoin (NOT) Price Prediction 2025

We anticipate that the future price of Notcoin will rise even further in 2025. More and more people may start holding and trading \$NOT tokens if the play-to-earn game keeps gaining traction among Telegram users. There is potential for Notcoin to strengthen its ties to the TONNE Network as a whole, which might lead to new use cases and increased demand for \$NOT.

The roadmap for Notcoin also explains the concept of the platform as a “Netflix for games.” More crypto games built on Notcoin’s infrastructure and using \$NOT as in-game currency and incentives could be possible with this platform. With this change, Notcoin would become more than just a game—it would become a hub for Web3 activity and a development ecosystem for crypto games.

The expansion of the TONNE Network is another factor that we believe will boost the value of \$NOT. A plethora of DeFi, crypto games, decentralised infrastructure, social networking, and other projects are being aggressively attracted to the TONNE Network by developers. The more TONNE Network grows, the more users it will attract, and many of those individuals will likely test out Notcoin’s play-to-earn game.

Considering all of this, we project that \$NOT will reach a low of \$0.090 by the end of 2025 and a high of \$0.150. We expect Notcoin’s token value to rise consistently over the year, however it is expected to experience some fluctuation.

2025	Price
Low	\$0.025
Average	\$0.090
High	\$0.150

[TRADE_PLUGIN]NOTUSDT,ETHUSDT[/TRADE_PLUGIN]

Notcoin (NOT) Price Prediction 2026-2030

We anticipate that many of the same trends that will impact Notcoin in 2025 will also contribute to its value growth in 2026 and beyond. The platform's development is crucial because it fosters an active ecosystem that brings new games and keeps people engaged. Instead of being a major growth driver, we anticipate that the original Notcoin game will be a marginal player in the Notcoin ecosystem by 2030.

The future seems bright for Notcoin's worth if crypto and Telegram continue to gain popularity over the rest of this decade. Because the TONNE Network on Telegram is frequently the simplest on-ramp to Web3, more people will experiment with crypto for the first time through that platform. These new users will have easy access to Notcoin, which will drive demand for \$NOT tokens for a very long time.

We estimate that \$NOT might reach \$0.145 by 2030, a gain of around 6x from its current price, while precise forecasts are challenging. That works out to \$15 billion in market cap, which is somewhat lower than today's market cap of \$TONNE.

By the end of the decade, \$NOT might reach a price of \$0.275 in a very bullish scenario, where TONNE Network becomes one of the most popular blockchains. The token's value might drop to roughly \$0.010 if \$NOT is unable to entice game developers to its ecosystem.

Here's our \$NOT price prediction for 2026-2030.

2026	\$0.105
2027	\$0.115
2028	\$0.130
2029	\$0.140
2030	\$0.145

Is Notcoin a Good Investment?

With its skyrocketing price and enormous trading volume, Notcoin is currently one of the most popular tokens on the cryptocurrency market. The current upswing may level out, but according to our Notcoin price prediction for today, the token's positive trend should carry over till 2025. Investing in Notcoin could yield huge returns if the cryptocurrency grows its developer community and Telegram user base.

However, not even our most optimistic forecast for Notcoin's price growth by 2025's conclusion suggests a gain of more than 6.25x. At the same time, a plethora of new cryptocurrencies are cropping up that might provide gains of tenfold or even one hundredfold. There may be better prospects in these new tokens for risk-takers and investors.

Investors should independently verify all information before purchasing \$NOT or any cryptocurrency. This is not financial advice, and there is no assurance that \$NOT's value will keep rising, even though we are enthusiastic on the cryptocurrency.

Notcoin Price Prediction FAQs

Is Notcoin TONNE Network's best token?

Other than \$TONNE, the original cryptocurrency of the ecosystem, we believe Notcoin to be the finest TONNE Network token to purchase. The \$NOT cryptocurrency has a lot of momentum and Notcoin's play-to-earn game is very well-liked, so it could benefit investors.

What does Notcoin's future hold?

Notably, a double bottom pattern is a bullish reversal pattern on a chart that arises following a decline and is distinguished by two separate lows at about the same level, signifying solid support and possible upward movement in price.

[Download App for Android](#)

[Download App for iOS](#)

Conclusion

By integrating with the popular messaging software Telegram, Notcoin has become a play-to-earn cryptocurrency built on the TONNE Network. Our Notcoin price prediction suggests that the \$NOT token might see further increases in the near future, adding to its recent surge to a \$2.5 billion valuation.

The prospective advantages from investing in Notcoin are very limited compared to other cryptocurrencies because it is already a large-cap crypto. Our guide to the top cryptocurrencies to buy right now is a must-read for investors seeking the most promising possibilities in the cryptocurrency industry.

Where To Trade Notcoin?

You can trade Notcoin futures on BTCC Now. Over 300 USDT-margined perpetual trading pairs are available for users to trade, including many popular altcoins and meme-coins.
