## What is NVIDIA Stock (NVDA)?

NVIDIA is a multinational corporation based in the United States that creates hardware for computers, mobile devices, and gaming consoles. The company specializes in designing mobile computing and automotive systems on a chip (SoCs), as well as high-end graphics processing units (GPUs) for the gaming and professional markets. Chipsets, drivers, tablets, laptops, TV add-ons, and CPUs are just a few of the various items that have made the firm famous (CPUs).

NVIDIA was established in 1993 by Jen-Hsun Huang, Curtis Priem, and Christopher Malachowsky, three American computer scientists. The company became well-known for creating high-quality integrated circuits utilized in several consumer electronics. Shield Portable, Shield Tablet, Shield Android TV, and GeForce Now are just a few of the products and services that have helped it become well-known in the gaming business.

Jensen Huang serves as President and CEO of NVIDIA, which has its headquarters in Santa Clara, California. The Nvidia Advanced Rendering Center and Mellanox Technologies are two of its primary affiliates. Recently, NVIDIA made a move to buy Arms Ltd., which would have been the largest acquisition in the history of the chip industry, but the deal ultimately fell through. The recent precipitous decline in the price of NVIDIA shares has been attributed, at least in part, to this flop.

## **NVIDIA Stock (NVDA) Price History**

Gaining some familiarity with NVIDIA is useful, but the focus of this essay is on forecasting the company's stock price. Having familiarized yourself with the business, it is time to investigate the stock's historical performance. The NVDA share price history that follows was compiled using information from Yahoo Finance.

On January 22, 1999, at a price of \$12 per share, NVIDIA held its successful first public offering. The stock price ranged from \$0.40 (opening price) to \$0.46 (closing price) on February 1, 1999. At the start of trading on June 30th, it was worth \$0.40, and by the end of the day it was worth \$0.42. It started trading at \$0.72 on December 1, 1999, and ended the day at \$0.98.

The 2018 year was a mixed bag for NVIDIA shareholders. The day began at \$48.94 and ended at \$61.45. On September 30th, it hit \$73.19. On December 1st, it opened at \$43.15, and by the end of the day, it had dropped to \$33.38. For the stock market, 2019 was akin to a year of construction. On January 1st, 2019, it opened at \$32.66 and ended the day at \$35.94. The price ranged from \$43.14 on June 30 to \$42.18 by day's end. On the 1st of December, NVDA's opening price was \$54.12 and its closing price was \$58.83.

When it comes to NVIDIA stock, 2020 is up there with the greatest years. On January 1st, it opened

at \$59.69 and ended the day at \$59.11. Midway through the year, it had already surpassed \$100. Opening at \$134.92 on December 1st, 2020, the price of the shares dropped to \$130.55 by market close.

NVIDIA stock did even better in 2021 than it did in 2020. It began trading at \$131.04 on the first of the year 2021, but by the end of the day it had dropped to \$129.90. In May, NVDA was trading at \$200, and by October, it was above \$300. As of the close of business on December 1, 2021, it had traded between \$332.19 and \$294.11.

There has been a recent decline in the price of NVIDIA shares. It began trading at \$298.15 on January 1, 2022, and ended the year at \$143.16.

## **Is NVDA a Good Investment?**

It goes without saying that NVIDIA is a reliable business partner. It has dominated the graphics processing unit (GPU) and chipset markets for years and has all the resources it needs to continue doing so. After its first public offering, NVIDIA stock has done exceptionally well. There have been dips in the stock price, but each time it has rebounded to provide investors with a greater return on their investment. You should definitely put money into the market.

In light of the stock's past performance and future expectations, NVDA appears to be a solid investment. Every savvy stock investor will rush in because of the promising growth forecast for the future years. You should keep in mind, however, that stock investment has a high degree of risk, and that forecasts are not always accurate.

Simply put, NVIDIA stock appears stable and promising. Despite recent downtrends, NVDA remains in a favorable position. Within a year, it will likely recover and begin a bullish run that can provide investors with a good return on investment. The time to invest is now, but go with caution because the market might be more difficult than you might expect.

## **Will NVIDIA Stock Hit \$1000?**

Nvidia's graphics cards and video games have gotten the company a lot of attention, but the company's future success will come from its data center solutions. There was already a global trend toward storing data in the cloud among businesses before the Covid-19 pandemic, but that trend has accelerated significantly since then.

The cloud storage market is only expected to grow as more companies move their data there. Nvidia is not only excellent at GPUs, but also at complicated tasks like those involved in AI. Nvidia is already threatening Intel's dominance in the data center by developing data processing units (DPU) capable of running such demanding applications.

Because of this, NVIDIA has formed vital alliances with industry leaders in cloud computing, including AWS, GCP, and Azure. NVIDIA stands to gain from the expanding cloud computing market, which bodes well for the company's future revenue and the price of NVDA stock.

Personal Visualization is another rapidly expanding area for Nvidia. With the help of Personal Visualization, Nvidia will be able to become a major player in Metaverse, which is a multitrillion dollar opportunity in the long term. The Omniverse is Nvidia's response to the Metaverse. There will reportedly be over 40 million designers utilizing Omniverse in the near future, and Nvidia will charge a license fee of \$1,000 per user.

Many experts predict that millions more people will use virtual assistants in the future, making Omniverse a potentially lucrative investment for Nvidia. Nvidia stands to benefit from the growth of the datacenter and the omniverse markets, despite the fact that these are currently smaller revenue categories than GPU sales.
