What is Omega Network (OMN)?

The British technology firm Omega Network has launched a cryptocurrency project called Omega Network. Its primary goal is to make it easier for more people to start using blockchains by allowing for the creation, mining, and dissemination of cryptocurrencies on mobile devices.

Individuals attempt to maintain a leading position when the globe shifts from a centralised to a decentralised setting. Many people would like to be able to mine Bitcoin and Ethereum, but doing so requires a sizable commitment of time, energy, technical expertise, and, sometimes, expensive resources.

To fill this void, Omega Network has set out to become the most popular platform for mining digital currencies using only a mobile device.
