Pi Coin Price Prediction: Will Pi Ever Be Worth Money?

Original:

<https://www.btcc.com/en-US/academy/research-analysis/pi-coin-price-prediction-2025-will-pi-coin-be-worth-anything>

The protocol celebrated its fourth anniversary on 14th March, Pi Day. As the Pi Network project nears its final stages, many people are wondering what the future will bring. In this article, we will examine the [Pi coin](#) price prediction for 2023, 2025 and 2030.

First, we must know the background: There is still no indication of when or even if the 38 million so-called "Pioneers" mined on Pi Network will benefit from their coins. As of 20 April, 2023, the Pi Network is still in its enclosed mainnet development, with the final open mainnet still not launched yet. It's hard to determine the pi coin value as it remains in pre-launch mode.

On the one hand, it is a promising project and is currently completely free to mine, which seems like easy money for some people. While on the other hand, there are so many pressing questions and misinformation surrounding one of the most controversial cryptocurrencies.

[Is Pi coin legit?](#) Is the Pi Network scam real? If not, [when will Pi coin launch?](#) Is Pi coin worth anything? At the moment, these could be a million dollar question in cryptocurrency circles.

Therefore, in addition to the Pi coin price prediction, we have also prepared an exhaustive Pi network review, including all the answers to the above questions, to help you learn more about it and determine if it is worth your time and effort.

Pi cryptocurrency is very mysterious, and reliable information is difficult to find. We have dug very deep into internet forums and blogs to find the latest updates about Pi Network. Prepare for an exciting and twisted journey, as the answer to the question "Is Pi coin real or fake?" comes in fifty shades of grey. Let's start it.

An Overview of Pi Network and Pi Coin

Here's a detailed summary of everything we've covered so far about Pi network and Pi coin that you may be interested in:

1. Launched on Pi Day, March 14, 2019, Pi Network is a mobile blockchain mining project on a mission to give everyone access to the crypto revolution.
2. This is accomplished by allowing anyone to mine Pi coins on their mobile devices without negatively impacting their battery life.
3. Pi crypto project uses Stellar's FBA mechanism, making it safer and more modern than the [PoW](#) consensus algorithm.
4. Users' mining capacity depends on the growth of their ecosystem, as the network uses halving to protect the value of Pi coins.
5. Pi Network launch date: Pi Network has evolved over the years and is currently at a vital stage of its Enclosed Mainnet development leading up to the Open Mainnet launch. The final stage of opening the mainnet to the public is on schedule, but there is no definite timeline yet.
6. Though several exchanges such as [Huobi](#) have listed Pi coin for trading in late 2022, the Pi Core team asserted that all these listings are conducted independently of the team, which are not approved and are not in line with the network's policies. The team is calling for the removal of the coin from these exchanges and is warning users not to engage in trading at this time.
7. As the hype around Pi ecosystem has been going on for years and the Pi crypto remains in the pre-release mode, some experts believe that it is just a scam.

There will be many projects for Pi enthusiasts in the cryptocurrency space. [BTCC](#) will keep you updated as the event unfolds.

Pi Network Launch Date: Pi Crypto is Getting Closer to the Open Mainnet Launch

In a nutshell, open Mainnet is the term used to describe when a blockchain convention is completely evolved and conveyed, which implies that the real publicly released blockchain itself that is openly undeniable.

Mainnet accomplishes the usefulness of executing real exchanges within the organization which is put away on the blockchain and is alluded to as the 'final result' available for the general population to utilize.

The Pi Core team has confirmed in its 2022 [end-of-year update](#) that Pi Network is currently at a significant phase of its enclosed mainnet development, the final stages of transition to a open mainnet - fully decentralized, access to the other blockchains, and enable Pi coins to trade with other cryptos or fiat currencies.

Since its mainnet migration began on August 3, 2022, Pi Network has been focused on technical improvements, KYC solution, Pi platform and ecosystem building, among others. According to its last statement:

“Pi is at an important point in Enclosed mainnet development, in which Pi is able to focus on two key priorities: enabling mass KYC and empowering ecosystem utilities-building. Both are essential steps toward our objective of building a viable ecosystem to get ready for Open Mainnet.”

So far the final stage of opening the mainnet to the public is on schedule, but there is no definite timeline for the transition yet.

This means that the Pi Network is still in the transition stage from testnet to mainnet. The Pi coin will become available for public sale when the transition is completed. The Pi Network doesn't have any ICOs or crowdfunding. Users who wish to join the Pi Network can download the app from the Google Play Store or Apple's App Store to start mining.

Pi Coin Value: Will Pi Ever Be Worth Money?

Investors may have seen Pi coin value publicly shown on a select few crypto exchanges, such as [Huobi](#), which has listed Pi for trading on 29 December 2022. But as we mentioned above, Pi network is still in its Enclosed Mainnet period, during which transaction of Pi through an exchange is prohibited.

There may be a lot of speculation about the future Pi coin value, but no one knows exactly. We will have to wait and see. At this moment, the protocol already has millions of active miners and users securing its network in beta. This is a fully-programmed space ready to explode once the network eventually goes live.

We believe that Pi coin will have its own real value only when the Pi Network launches its open mainnet to the public finally. If this really come true, Pi project will definitely have its own

innovations.

Pi Network Scam: Is Pi Coin Legit?

Is Pi Network legit? There are strong arguments on both sides:

On the one side, there is a list of advantages:

- the number of people already participating in the network is impressive
- the ideas touted in its white paper are real and credible

- its blockchain technology is promising in terms of accessibility and environmental impact
- there are signs that companies are willing to accept Pi coin as payment currency
- the founders come from a significant educational institution that instills trust

On the other side, there are some pressing questions:

- lack of transparency: trustworthy information is hard to find and scattered across online blogs, forums and Reddit discussions
- Google Play Store has many negative Pi app reviews
- no evidence of a blockchain behind Pi Network
- the process of generating Pi coins is officially called mining, although it is not essentially mining
- there are unresolved data and privacy issues

To summarize, there is unfortunately no way to know the answer to the question whether Pi coin is legit currently.

There is no cost to install the application. And, many current Pi users do not believe in its future and continue to mine just in case. This also does not instill trust.

For all these reasons, it is impossible to make a final judgment. Pi Coin is a good idea, and it has a real (though modest) chance of success. In some ways, it recalls the early days of BTC. In other cases, it evokes bad memories of the OneCoin scam. At the same time, Pi presents significant risks in terms of information scarcity and data protection. Therefore, everyone should decide if it's worth the risk of your personal data falling into the wrong hands.

What is Pi Network?

The Pi network is unique in many ways, and not just because the cryptocurrency's mainnet isn't launched yet. For one, the Pi coin is rather easy to mine. The developers assume that you can mine the cryptocurrency on your mobile phone. You only need to download the Pi network app and get an invitation from existing trusted members.

Unlike other apps for mining, the Pi app is eco-friendly and doesn't drain your phone battery. It benefits from users vouching for each other as they try to secure their ledger.

To start mining the Pi cryptocurrency, you need to open the app at least once per 24 hours and tap the lightning button. You can increase your mining speed in many ways. You can earn higher rates if you're an early member. You can make a 25% bonus by inviting other trusted members to join the Pi app. In three days of mining the Pi cryptocurrency, you become a contributor by inviting 3-5 people to join your trusted circle, which allows you to grow your earnings and improve the overall security of the Pi network.

The Pi network is a digital currency project. Its main goal is to make cryptocurrency mining more accessible. Unlike mining Bitcoin, which has put cryptocurrency mining beyond the reach of everyday users, the Pi network allows you to mine coins using a mobile phone app. Unlike Bitcoin, which uses the proof-of-work (PoW) protocols, Pi nodes use an algorithm based on the Stellar Consensus Protocol (SCP), as part of which Pi nodes validate transactions on a distributed ledger and reach a consensus on the order of new transactions the ledger records.

Pi nodes form security groups made up of three to five people. Such security circles build a global trust network that prevents fraudulent transactions. All transactions can only be validated on the shared ledger in the Pi network if all trusted Pi nodes approve them.

The Pi network is more than just a cryptocurrency mining app. It's an ecosystem of related services, including a test version of the Pi wallet that lets you make payments in 8 seconds. The Pi browser app is also available, allowing developers to test and launch decentralised third-party Pi apps.

The Pi network also allows users to become Pi nodes. However, it doesn't provide you with any benefits at the moment. Pi nodes validate transactions. The owners of Pi nodes will be able to get a cut of transaction fees only when the open mainnet launches and the Pi coin gets listed on cryptocurrency exchanges.

One person can have only one Pi account, and 25% of all Pi coins are allocated to the Pi core team. The project is currently in an enclosed mainnet stage, which allows only users within the Pi ecosystem to use Pi for trading, buying and selling. One needs to complete KYC verification to start trading.

If you believe in the project's future and feel optimistic about the Pi Network price prediction, you can get your Pi node now. Recently, the number of Pi nodes has exceeded 12,000.

[Download App for iOS](#)

Three Stages of Pi Network

- There are three phases of the Pi network project. Phase 1 was launched on 14 March 2019, Pi Day. It's quite logical because the network's branding is based on the number π . By June 2019, the network had more than 100,000 active users.
- Phase 2 started a year later when the number of active participants totalled 3.5 million. To finance the project, the first Pi ads were launched in May 2020. In less than half a year, on 25 November, the total number of active users engaged in the Pi network reached 29 million.

Just like Bitcoin, with the purpose of protecting its scarcity, Pi coin was designed to undergo halving, when the number of coins a miner receives for processing new transactions is reduced by half.

Halving generally takes place when a certain milestone is reached. For example, the mining rate of the Pi coin halved from 1.6 π an hour when it reached 100,000 active users in the network. The next time halving to 0.4 π was recorded when the number of users reached 1 million. Halving to 0.2 π took place when the milestone of 10 million users was reached.

As part of the Pi project's Phase 2, users can test Pi Node on their computers, as well as Pi Wallet and Pi Browser, which was officially released on 1 April 2021.

- The launch of Phase 3 was announced on 29 December 2021, and up to now, it remains in the pre-release mode.

Users who have mined the Pi coin only have a chance to withdraw or exchange coins during Phase 3, when the cryptocurrency moves to a decentralised blockchain. While the cryptocurrency remains in the testing period, users can't transfer Pi coins. It's done to prevent fake accounts from accumulating Pi coins. Users can honour wallet balances only when the cryptocurrency shifts from the testnet to the mainnet and when the blockchain network is fully deployed.

While the Pi coin is in Phase 3, the cryptocurrency's holders can only use the coin to buy products and services on Pi's peer-to-peer marketplaces while taking control of their public and private keys. The Pi holders can't spend the cryptocurrency without these keys.

To start mining Pi coins, one needs to install the Pi mining app, which works as a cryptocurrency wallet connected to a user's smartphone or Facebook account. Like other public blockchains, the Pi blockchain allows external wallets to hold Pi coins and submit transactions directly to the Pi blockchain. However, these procedures are impossible because the developers haven't released the source code yet.

Early adopters anticipate the future price of the Pi network to increase after Phase 3. Even though the coin's mining rate has been reduced by halving, one can still increase the Pi mining rate by connecting with other active miners.

According to the Pi project's developers, personal networks enhance the security of the Pi Network by bringing in family and friends. Some may feel sceptical, claiming that such a structure of the Pi

Network could be a pyramid scheme. However, unlike the MLM scheme, the Pi network users can only earn coins from the direct networks of their connections.

At the end of 2021, the organisation started releasing tech and product updates to improve the Pi Ecosystem. The KYC App Pilot is listed among the innovations that have been deployed on a limited basis. The purpose of using the KYC App Pilot is to improve the app's usability, enhance machine automation and start the verification process of the Pi holders. As part of the innovation and improvement process, the Pi Block Explorer has also been released. With its help, Pioneers can see transaction history, the sender, receiver and the number of Pi coins deployed.

Pi Wallet also underwent a major update, as part of which Pioneers started receiving notifications about the payments they've received on the blockchain. The Pi Wallet update also included bug fixes for Android users who couldn't check their wallet passphrase.

Even though the Pi network is in the pre-launch mode, some observers have already started making Pi network price predictions. Let's see what the Pi coin price could be when it starts trading.

Pi Coin Price Prediction 2023

- WalletInvestor predicts the Pi coin will be a bad, high-risk 1-year investment. The platform shares the following Pi network price predictions based on the price gains of the leading social/technological innovations like Facebook, Smartphones, Data, etc. Thus, WalletInvestor estimates the Pi coin's price would be \$0.00111 by the end of 2023.
- CoinDataFlow provides a Pi Network price prediction based on Bitcoin's growth pattern. It estimates the Pi coin's price will reach a minimum of \$27.60 or a maximum of \$40.81 in 2023.
- According to Crypto Investor Pi Network price prediction, the PI coin might be exchanging at around \$22 before the end of 2023.

- Reddit Community estimates the PI coin should have long-haul benefits. The Pi Network price might arrive at the objective of over \$18 by the end of 2023.

[Download App for iOS](#)

Pi Coin Price Prediction 2025

It is important to remember that the crypto market is still very volatile, making it difficult to accurately predict the price of the coin within a few hours and even more difficult to give long-term estimates, such as Pi crypto price prediction 2025. As a result, analysts can and do get their forecasts wrong.

So before you read further, please keep in mind that this is not investment advice in any manner.

At press time, the price action for Pi coin is still unknown as it's still in pre-release mode. However, this is not expected to be the norm for long.

Pi Network is expected to continue its pace of blockchain integration. A crucial metric for its success would be to build up its developer ecosystem. The launch of its hackathon indicates what the network intends in the long term.

Given its use of the Stellar Consensus Protocol (SCP), it would be easy for decentralized applications

(dApps) to build and onboard the smart contract platform.

A strong developer ecosystem would provide more use cases for Pi coin. Network upgrades are also expected, and a foray into NFTs, DeFi, and Metaverse ecosystems would do the digital asset a world of good. This could drive the Pi coin value well above the \$10 range in 2025.

GET 10,055 USDT DEPOSIT BONUS

Pi Coin Price Prediction 2030

Pi crypto price prediction 2030 is probably more speculative, and the Pi coin value in 2030 may depend on when the cryptocurrency goes live for trading and how it performs after launch. Estimates from some users on social media range from \$1 to hundreds of dollars.

Pi Coin Price Prediction FAQs

1. Is Pi coin real or fake?

Currently, no one knows the answer to the question whether Pi coins are real and legal. There is no cost to install the application. However, there may be issues regarding data privacy and lack of transparency.

2. Is Pi Network worth anything?

As Pi Network is still in its enclosed mainnet period and has not yet launched the open mainnet, the platform insists that its token is currently not tradeable during the period. We believe that Pi coin will have its own real value only when Pi Network launches the much-anticipated open mainnet to the public finally. So will Pi ever be worth money? We have to wait and see.

3. How much is 1 Pi in dollars?

Though several exchanges such as Huobi has listed Pi coin and shows live Pi network value, the Pi Core team asserted that all these listings were conducted independently of the team and were not approved. The team is calling for the removal of the coin from these exchanges and is warning users not to engage in trading at this time.

4. What stage is Pi Network now? Will Pi Network ever launch?

Pi Network has evolved over the years and is currently in its final stages of opening the mainnet to the public. The transition is on schedule, but there is no definite timeline yet.

5. Does it have a Pi wallet app?

Yes, but Pi wallet currently only connect to the Testnet, with only Test-Pi for testing. It will have the real Pi coins inside when Pi Network mainnet goes live, when it will enable actual Pi transfers.

6. Is Pi mining legal?

Yes, it is legal as it does not involve any cash investments to mine it. All you need is about 20 seconds of your time (typically less than 20 seconds) to click on the lightning button to start [mining](#) once every 24 hours. If you already have the app, you can wait to see if the founders build something of significant value.

How to Trade Crypto Futures on BTCC ?

To trade Crypto Futures on BTCC, follow these simple steps:

- **Create an account**

Go to the [BTCC website](#) and fill out the registration form with the necessary details. Finish the checks to make sure you're in line with the stock exchange's rules.

- **Deposit funds**

Fund your BTCC wallet once your account has been created and verified. You can fund your BTCC account with a number of different cryptocurrencies and fiat currencies.

- **Navigate to the crypto trading section**

You can begin trading on the BTCC platform as soon as your account has been funded. Find the

crypto exchange rate, which is written as crypto/Bitcoin (BTC) or crypto/US Dollar (USDT) depending on the other pairs available.s.

- **Choose your trading type**

Both spot trading and futures trading are available through BTCC. If you want to purchase or sell crypto tokens at the current market price, you may want to investigate spot trading. If you'd rather trade crypto with leverage and speculate on its price movements, you can do so with crypto Futures.

- **Place your trade**

After deciding which type of deal you want to make, you can enter the amount of crypto you like to buy or sell, as well as your preferred price (if necessary). If everything checks out, go ahead and make the deal.

- **Monitor and manage your trades**

Be sure to monitor your crypto holdings on the BTCC exchange. To limit losses and protect gains, you can use stop-loss and take-profit orders. It is also important to keep up with the latest crypto market trends and news if you want to successfully trade this cryptocurrency.

Before becoming involved in any kind of trading, make sure you've done your homework. Due to the extreme volatility of the cryptocurrency markets, it is crucial to have a well-defined trading strategy and risk management framework in place. To successfully trade crypto on the BTCC market and take advantage of the chances it provides, follow these procedures and keep yourself updated.
