## What Is Pixelverse (PIXFI)?

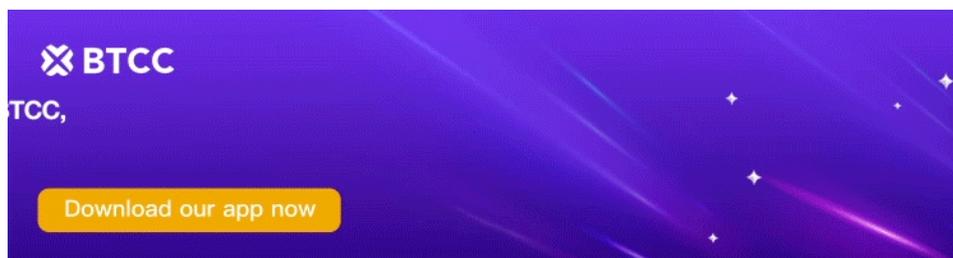

After the success of web3 games such as StepApp and Notcoin, Pixelverse has become the next big thing in Telegram-based gaming, attracting over 15 million players since its inception in March. Pixelverse takes place in the cyberpunk metropolis of Xenon, where players fight enemies and

complete quests in the pursuit of artefacts, bot upgrades, and NFT security. The game's native token, \$PIXFI, provides a novel combination of exploration and strategy with the possibility of real-world rewards.

Pixelverse, which debuted its mini-game on Telegram in June, has just raised \$5.5 million to fuel its expansion. Notable investors include Delphi Ventures and Joonmo (James) Kwon, the former CEO of Nexon. With this money, we can make the game's environment better and attract more players.

Participate in the public demo phase of the Pixelverse game to test out the basics of the gameplay and provide input for future improvements. After the preview, Pixelverse will enter a public alpha phase when they will add more content and grow the game universe. After that, there will be a public beta period where users will have access to a nearly finished product prior to the final release.
