Polygon MATIC Prediction: Will Tamadoge Coin Price Overtake It in 2022?

Original:

<https://www.btcc.com/en-US/academy/research-analysis/polygon-matic-prediction-will-tamadoge-coin-price-overtake-it-in-2022>

The changes in the cryptocurrency market are taking our breath away. It seems that new things are happening every hour. Investors are uneasy about the investments they have made and the ones they plan to make, because making decisions is not easy in such a volatile market. In this article we cover a [Polygon MATIC](#) prediction and a brief glance at the coin, but since the Polygon price has plummeted by 10% and we expect to see 25% soon, we will also introduce a new promising coin that will not encounter such problems – [Tamadoge](#) (TAMA). Let's review the most important details!

Polygon MATIC Prediction

Before we get into the details of Polygon's position in the market, let's take a look at the price forecast chart.

Year	Estimated Price
2022	\$1.50
2023	\$10
2025	\$40

Based on the price forecast, [Polygon](#) (MATIC) seems to have a bright future. However, the last few days have put a big question mark on it, as the price has dropped dramatically. Currently the Polygon price has fallen by more than 70% from its highest price to date. Experts believe that the price could fall further in the coming days.

Investing in Polygon during such a drop would be a huge risk, which means that while the situation is developing, we can expect no one to want to go near it. If you are eager to invest, then watching the market can help you decide what you should do next. A rising star that is being characterized as the next [Dogecoin](#), [Shiba Inu](#), or [Battle Infinity](#) is Tamadoge (TAMA), a hottest new meme coin that has swept the industry since its [presale](#) launched on July 2. In the short time the play to earn crypto project has attracted extremely high buying volume, hitting the \$8.5 million milestone currently,

with only 40% of presale left.

What Exactly Is Tamadoge (TAMA)? Why Choose it?

Tamadoge appears to be a [play-to-earn](#) crypto game that has been generating the most excitement in the last few years. TAMA is a meme coin that with an ecosystem similar to Dogecoin and Shiba Inu, which is why it managed to instantly attract new players to come on board. Tamadoge is a project that features the [metaverse](#), but it is also a combination of NFTs and a P2E system. TAMA is also a deflationary meme coin with a true and versatile utility, the first of its kind, a fact alone that could make Tamadoge one of the best-performing meme coins in the coming years.

The players get a chance to buy a pet, feed it, train it and then battle with it in order to raise as much as Dogepoints as possible. The player who manages to gather the most points will climb to the top of the leaderboard and receive the most lucrative prize, thanks to the funnel to the Tamadoge system. Each month, the players with the most Dogepoints will have the chance to claim the winning from the Dogepool.

Still in the presale phase, TAMA coin is not yet listed on any crypto exchange, but it has been announced that it will be listed on [LBank](#) and Uniswap, making it easily accessible to all those eager to invest. TAMA coin will have a wider exposure, which means that the number of investors will increase and therefore the price will rise, as the demand determines the market.

Investors who are looking to buy TAMA should take advantage of the price that is now lower than the next stage. Keeping up with news about the Tamadoge ecosystem is easy, as there is a Tamadoge Telegram channel with more than 27,000 members. TAMA coin can be purchased directly on the official Tamadoge website.

Check out our detailed guide on [how and where to buy Tamadoge on presale](#).

Polygon MATIC Prediction: What's the Future of Polygon?

Polygon (MATIC) is initially a coin that solves the problems of Ethereum in terms of scalability. The fact that it could make transactions faster first attracted investors to MATIC, and earlier this year, Polygon announced some new features for its new Token List service on Twitter.

However, despite these new features and a very bullish \$2.50 price at the beginning of the year, the price now seems to keep falling and getting lower, sending investors running in the other direction. Despite the predictions made by experts earlier this year, it seems that we can't stick with it for now, as it's hard to expect any type of stability when it comes to coins with such volatile prices.

Tamadoge (TAMA) or Polygon (MATIC) - Which Is a Better Choice?

MATIC is currently in a very bad position in the market and the current forecast is quite pessimistic. We can't say what will happen in the future, because there could be some turning moments, but it is unlikely to happen now. Until this changes, we think it's best to choose to invest in a coin that is well positioned in the market, and Tamadoge (TAMA) definitely is! All experts recommend investing in the coin from the beginning, as it has a lot of room for growth.

TAMA is KYC'd on CoinSniper, and the smart contract is audited by Solid Proof, which makes it pull-resistant and fully safe for investors. TAMA meme coin is built on Ethereum, unlike other meme coins, there will be transactions between the players. There are two billion tokens in total, half of which will be available during the presale. The rest of the coins will be used to enhance liquidity, while 5% of the tokens will be burnt, which will increase the price by reducing the supply.

In addition, investors will enjoy many surprises when it comes to the Tamadoge ecosystem. There

will be a very impressive coin giveaway, equivalent to \$100,000. Those eligible for this giveaway are the investors who will hold their TAMA coins until the drawing. In order to be considered for the sweepstakes, each investor must purchase at least \$100 worth of TAMA tokens. The giveaway is scheduled to take place on September 10, so keep that date in mind if you want to invest. The investment must happen before it. Next, you should visit the official giveaway page and provide the required information, then start from there. The process will take a few minutes, but will provide you with a great opportunity to own TAMA coins.

The Tamadoge platform will organize giveaways on a regular basis, so this seems like an opportunity not to be missed. It seems that the many investors who already own TAMA coins and plan to buy more see it as the best meme coin of the future, and for a good reason - it already managed to do what Dogecoin and Shiba Inu didn't and that is to have the utility, a blend of fun, plenty of opportunities for earning and prizes that will motivate players to keep going.

Polygon MATIC Prediction: Conclusion

It can be pretty nerve reeking to see the changes in the market, especially for those who had high hopes for Polygon (MATIC). The recent price drop has meant a loss of investment, and from the news we've received, it looks like things have gotten worse. On the other hand, with more and more community support for Tamadoge and the investments that are growing as we forecasted, the new star seems to be right in town and missing out on the investment could be a very big mistake. Fortunately, there's a little time to correct it during the presale!
