Base Dawgz (DAWGZ) Presale

Before launching \$DAWGZ on Base Chain, Base Dawgz are offering a chance for early supporters to get a solid ground rush and participate in the presale.

Base Dawgz allocates 20% of its 8.45 billion tokens for its presale, approximately 1.69 billion tokens.

Base Dawgz started its presale in June 4, pricing each \$DAWGZ token at just \$0.00479 in Stage 1 of its presale. \$DAWGZ can be bought with ETH, SOL, BNB, AVAX and USDT.

Currently, the presale price has moved up to \$0.0061 per \$ DAWGZ, but that hasn't stopped Base Dawgz from easily blowing through each successive price stage target.

So far, Base Dawgz (\$DAWGZ) presale has raised more than \$2.5 million and is still climbing. However, like most other presales, the token's price will increase with each new stage.

The image shows a digital interface for a token presale. At the top, the word "Presale" is displayed in a white, stylized font. To the right, a large yellow circular badge with a red ribbon contains the text "1548%" and "current APY" in red. Below this, a timer shows "0d 4h 32m 54s" in red, with the text "until next price increase" underneath. The exchange rate "1 DAWGZ = 0.0061 USD" is shown in white. A red progress bar indicates "\$2,521,397 raised". Below the bar are five circular icons for different cryptocurrencies: Bitcoin, Ethereum, Binance Coin, Cardano, and Monero. Two input fields are present: "Buy with eth / USdt" with a value of "0" and "Receive DAWGZ" with a value of "0". A large red button labeled "connect wallet" is positioned below these fields. Underneath the button, the text "connect to view purchased tokens" is visible. At the bottom, the text "Total currently staked:" is followed by "21.9%". The background features a cartoon dog's head on the right and a meme character's face at the bottom right.

With another price jump happening in less than one day, investors should grab the opportunity now to join the presale and stake their \$DAWGZ for a high APY. After that, the token will see a price boost in multiple presale stages until it concludes the ICO and reaches its first listing.
