### What is XEN Crypto?

[XEN Crypto](#) (XENducation Video) is a self-custodial exchange of value that aspires to become a community-building Crypto asset that brings like-minded people together and supports localized, grass-roots educational initiatives. The protocol is based on the Polygon, BSC, and Pulsechain blockchains, with support for the Ethereum blockchain coming soon.

The \$XEN token is an entity's value that aims to become a universal Cryptocurrency by adhering to the first principles of blockchain technology, including decentralization, transparency, counterpart risk-resistance, peer-to-peer value exchange, and self-custody. Jack Levin (Video) explains why \$XEN is unlike any other cryptocurrency out today.

For the first time since the Merge, Ether experiences deflation. According to CoinDesk, a big increase in network traffic last weekend was generated by the XEN network, which triggered Ether's deflationary burn rate.
