

The image is a promotional banner for BTCC. On the left, the BTCC logo is displayed above the text "Enjoy fees as low as 0.03%". Below this, there are four bullet points: "70+ crypto futures", "24/7 customer support", "100,000 USDT for demo trading", "10-150x flexible leverage", and "Support credit card deposits". On the right side, there is a graphic of a smartphone displaying various financial charts and data. A yellow button labeled "Register Now" is positioned at the bottom right of the graphic area.

BTCC
Enjoy fees as low as 0.03%

- 70+ crypto futures
- 24/7 customer support
- 100,000 USDT for demo trading
- 10-150x flexible leverage
- Support credit card deposits

About Bora (BORA)

Original:

<https://www.btcc.com/en-US/markets/BORA>

Bora is a DAPP platform designed to solve current industry problems by using a dual [blockchain](#) structure and a proprietary token mechanism to distribute games and digital content and promote user interaction. The token of the platform is also called Bora coin. Details about what is a bora coin, how it works, how much it costs, and how to buy it are in the continuation of the content.

What is Bora Coin?

Bora provides a solution that enables secure and transparent distribution of content and preserves and unlocks the value of digital assets on the blockchain. In addition, the Bora platform is designed with a modular architecture, allowing content providers to implement blockchain independently.

This ensures that the data and operations of each service can work independently without affecting other services on the platform. At the same time, users can utilize various content services provided by Bora ecosystem through a unified user experience.

User identities, accounts and assets are fully integrated and compatible within the ecosystem, and the performance and scalability of the Bora platform can seamlessly handle the activities of these content services.

Where Can I Buy Bora Coins?

Bora uses a dual blockchain architecture, which is composed of Ethereum main network and multiple sets of side chains. Each set of side chains can process 2200 TPS (transactions per second). The design is modular and easy to expand. For example, five sets of side chains would be able to handle a total of 11000 TPS (2200 TPS x 5). There are no structural restrictions on the expansion of the side chain, so the performance can be infinitely expanded by using additional side chain groups.

Bora coins can be purchased from its listed cryptocurrency exchange. But before trading, it is necessary to ensure that the stock market is reliable. As of October 22, 2021, the price of one Bora coin is about US \$0.20. (prices may change immediately)
