About Telcoin (TEL)

Original:

<https://www.btcc.com/en-US/markets/Telcoin-USD>

Established in July 2017 in Singapore, Telcoin (TEL) leverages [blockchain](#) technology to enable end users to seamlessly access and power a global suite of user-owned, decentralized financial products. It aims to connect with mobile networks globally, enabling easy conversion between telecom mobile money, prepaid credit, and postpaid billing platforms.

TEL incentives coordinate market participants to provide specific value added services to end users of the platform to provide every mobile phone user in the world with access to fast and affordable, user-owned financial products, far superior to traditional banking services.

What Makes Telcoin Different?

Telcoin aims to productize decentralized finance into seamless, automated, user owned applications and distribute those products and services through telecoms to every mobile phone user in the world.

With over 5 billion users, Telecoms are positioned to provide the largest base of existing, known global retail users with access to financial products via mobile phones they use every day.

DeFi has revolutionized finance by enabling the creation of user owned, automated, non-custodial applications accessible to everyone with an internet connection that execute in code rather than through intermediary institutions.

Telcoin is capturing this market opportunity by aligning with telecoms and enabling them to distribute superior, decentralized, automated financial products to their subscribers, taking on a fraction of traditional finance counterparty, execution, and custody risk.

Where Can You Buy the Telcoin (TEL)?

Although TEL is a very popular [crypto](#) asset, few exchanges provide the facility to purchase TEL tokens against fiat. You can buy TEL tokens against cryptocurrencies like Bitcoin (BTC) and Ethereum (ETH).

The top exchanges for buying, selling, and trading in Telcoin (TEL) include KuCoin, Uniswap, Sushiswap etc.
